The

Somewhat Fair  
Very Strict

For the most part, business relationships are not as resilient as they should be. You need to take the time to build a strong relationship with your customers, partners, and vendors. This is especially true in a rapidly changing environment where the need for change is constant. You can together identify ways to become more resilient with customers, team leads, and vendors. You may also need to clarify and agree on your values as a team, and your vision for success. Then use your current top priority business goals to practice new behaviors for conflict, decision-making and communication. This link to return to the [online course](#) "Agile Leadership."
